Streamlining IT Procurement:Automating Standard Laptop Orders with Flow Designer

Introduction :

The Streamlining IT Procurement: Automated Laptop Orders with Flow Designer project focuses on automating and simplifying the IT procurement process in ServiceNow. In a typical organization, requesting a new laptop involves multiple manual steps, approvals, and coordination between departments, which causes delays and inefficiencies. This project leverages ServiceNow Flow Designer to create an automated end-to-end workflow for laptop ordering. When an employee submits a request through the Service Catalog, the flow automatically triggers approval processes, assigns tasks to the procurement team, tracks inventory, and updates the requester on the status. This ensures faster fulfillment, reduces manual effort, provides better visibility, and improves the overall employee experience by making IT procurement more efficient and transparent.

Project Objective :

The main objective of this project is to automate standard laptop orders using ServiceNow Flow Designer.

The project aims to:

- ⑩ Automate the standard laptop ordering process.
- ⑩ Reduce manual effort and processing time.
- ⑩ Implement an approval workflow for laptop requests.
- ⑩ Track order status and improve transparency.
- ⑩ Minimize errors and improve IT procurement efficiency.
- ⑩ Demonstrate workflow automation using ServiceNow Flow Designer.

CREATION AND RULES :

Milestone 1 : Flow

Activity 1: Create a Flow to Create Catalog task to update the short description after Approval the service Request and it will be Assignment group to Hardware.

1. Open service now.
2. Click on All >> search for Flow Designer
3. Click on Flow Designer under Process Automation.
4. After opening Flow Designer Click on new and select Flow.
5. Under Flow properties Give Flow Name as “ Standard laptop task”.

6. Application should be Global.
7. Select Run user as “System user ” from that choice.
8. Click on Submit.

12. Now under Actions.
13. Click on Add an action.
14. Select action in that search for “ Create Catalog Task ” and select that.
15. Mention these in that action
16. Action as Create Catalog Task
17. Drag and drop the Requested Item Record in the Request item.
18. Table will be auto populated as a Catalog Task.
19. Mention the short description as “ Laptop need to Configured ”.
20. Click on add field value
21. Select description field and value as “ Laptop need to Configured ”.
22. Select Assignment group field and value as “ Hardware”.
23. Select Approval field and value as “Approved ”.
24. Leave the remaining as default and click on Done.
25. Click on save the Flow.
26. And Click on Activate again click on Activate.

Milestone 2 : Flow assignment

Assignment to Standard Laptop Service Catalog

1. Open ServiceNow.
2. Click All and search for Maintain Items.
3. Select Maintain Items.
4. Under the Name field, search for Standard Laptop.
5. Select the Standard Laptop record.
6. Under the record, select Process Engine.
7. Remove the remaining automations and add Flow.
8. Add the flow created with the name "Standard Laptop Task".
9. Click the Update/Save button to save the record.

The image consists of two screenshots of the ServiceNow web interface. The top screenshot shows the 'All' view of the Service Catalog with a search for 'maintain it'. The 'ALL RESULTS' section lists 'Service Catalog', 'Catalog Definitions', 'Maintain Dynamic Categories', and 'Maintain It' (highlighted). The bottom screenshot shows the 'Catalog Item - Standard Laptop' details page. The 'Catalog' is set to 'Service Catalog', 'Category' is 'Hardware', and 'State' is 'None'. The 'Process Engine' tab is active, showing 'Flow' as 'Standard Laptop Task' and 'Workflow' as 'Standard Laptop'. The 'Search' button is visible at the bottom right of the details section.

Milestone 3: Service Catalog

Activity 1: Service Catalog for Placing Order and Getting Approval

1. Click All and search for Service Catalog.
2. Click Service Catalog and select Hardware.
3. Scroll down and find Standard Laptop.
4. Click Standard Laptop.

5. Click Order Now to place the laptop request.
6. The Order Status page will be displayed.
7. Click on the Request Number.
8. The Requested Item Record will be opened.
9. Scroll down to the Approvers section.
10. Right-click on the record and select Configure → Approve.
11. Click on the Requested Item section.
12. Open the Requested Item Record.
13. Scroll down to the Catalog Tasks section
14. Open the catalog task record to view the updated status, Short Description, and Assignment Group.

Conclusion :

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project effectively addresses inefficiencies and reduces manual overhead. This streamlined workflow ensures timely configuration of laptops, minimizes user wait times, and enhances overall productivity within the IT department. The implementation of this automated solution not only optimizes resource allocation but also significantly improves the user experience by providing a seamless and efficient procurement process.
